

New Universal PTAC Board

As of January 2020, Amana is using a new Universal Board for all PTACs: APRSKP0012.

Once stock of APRSKP0010 and APRSKP0009 depletes, Stevens Equipment Supply will stock the updated universal board in the following options:

Board Only
APRSKP0012

In the future, we will stop offering this SKU, and replace it with APRSKP0013, which is the same cost.

Board + Wiring Harness
APRSKP0013
Replacement for APRSKP0010

The included harness helps with the old to new board install transition.

Board Kit
APRSKP0014
Replacement for APRSKP0009

Kit Includes: board, wiring harness, digital controls and membrane, all thermistors, and a transformer

Please Note: **APRSKP0009** and **APRSKP0010** boards CANNOT be used in units newer than March 2015. **APRSKP00012**, the new board, can be used in all units, including older models.

Please reach out to Stevens Equipment Supply's PTAC or Parts Departments with any questions.
